

Flat roof hopper:

- Zinc
- Copper
- UGINOX Patina K41

Kubic flat roof hopper:

- Zinc
- UGINOX Patina K41

## THE FLAT ROOF HOPPERS

The pre-punched inflow opening (NG 75/NG 100/NG 110) and pre-mounted seal make for easy installation. Where it previously had to be tediously cut and adjusted, the hopper can now easily be inserted through the prepared inflow opening on the pipe and mounted directly on the wall.

### Open for quick assembly

Pre-punched intake opening and pre-mounted seal make it easy: Just stick the hopper on the intake pipe – and it stays.

### On the wall and done

The hopper can be mounted directly on the wall according to alignment.
